

FINAL INSPECTION

It should be remembered that the loading priority and the positioning of the vehicles on the car belongs to the Armed Forces. **THE CARRIER'S INSPECTOR SHOULD BE PRESENT WHEN THE ACTUAL LOADING IS PERFORMED. A FINAL INSPECTION MUST** be made by the railroad inspector accepting the load and a representative of the Armed Forces. The railroad inspector has the final word concerning the acceptance of the loads. In case a disagreement concerning the Loading Rules occurs, it must be reported to the individual in charge of Car Loading Rules at the RAC (Tel: (613) 567-8591) who will provide authoritative interpretation on proper loading practices and regulations.
