

## **TIE-DOWN CONFIGURATIONS FOR SPECIALLY EQUIPPED RAIL FLAT CARS**

Now that we have covered the previous sections as an introduction to the actual loading, it is time to get on with the job. You will see in this section that it is very easy to load military equipment on open top cars. By following simple rules as set forth in this section, you, the driver, will be able to load and tie down your own equipment under the direct supervision of the movement control organization and the railway inspector. It is an easy process as the rail cars are already equipped with chain tie-down systems. You must be careful when loading your vehicle on the rail cars and follow the rules that are of safety to you and the equipment.

This section is divided into three parts:

- WHEELED VEHICLES**
- TRACKED VEHICLES**
- ENGINEERING EQUIPMENT**
